AGILE AND SMART: CONTRACT MANUFACTURING AT MAGNA STEYR

In cooperation with Magna Steyr, the Automotive Circle is hosting an Insight assembly conference at Magna's Austrian site in Graz from 24-25 September 2019.

The world's largest multi OEM contract manufacturer produces a wide range of different vehicle models at one location: from the legendary Mercedes-Benz G-Class to the BMW 5 Series and Z4 to the new models Toyota GR Supra and Jaguar E-PACE and I-PACE (Car of the Year 2019).

With the production of vehicles with conventional drive types to plug-in hybrids and the purely electrically driven I-PACE, Magna Steyr demonstrates that the company masters the agile production of different drive types on a single line and is thus already successfully mastering a central challenge for tomorrow's production.

Be an active part of our top-class assembly network and participate with a presentation in the discussion of the following questions:

- ▶ How can different models, variants and drive types be manufactured as flexibly and efficiently as possible in one factory?
- ▶ Which requirements have to be fulfilled in the production of electric vehicles and their integration into existing assembly structures?
- ▶ How must logistics supply processes and transport systems be structured to support agile assembly?
- ▶ Which intelligent technologies from the "smart factory" are available to optimize the agility of assembly?

WE'D VERY MUCH LIKE TO HEAR FROM YOU!

- ▶ Join us and participate in the discussion of these questions. We look forward to your in-depth technical report and intensive exchange of information with you.

DEADLINE FOR SUBMISSIONS: 29 APRIL 2019

Interested speakers are kindly requested to submit an abstract of their suggested contribution via our [online form](#). Based on your input, we will evaluate your suggestion.
